PROFESSIONAL SUMMARY

Computer Science undergraduate with hands-on, self-driven experience across the full software development lifecycle designing, building, testing, and deploying full-stack applications using Python, FastAPI, Node.js, React.js, Next.js, and SQL/NoSQL databases. Currently building professional experience as a full-stack intern at Agrisethu Private Limited and a Frontend Developer intern at Resolute AI Software Private Limited. Comfortable in collaborative, team-based settings, having contributed to a 7-member hackathon team, and known for a sharp mind for debugging backed by a 1st-place finish in an inter-college debugging competition. Strong grounding in data structures, OOP, REST API design, authentication, and Git-based version control, with working exposure to AWS and CI/CD pipelines.

TECHNICAL SKILLS

Core CS Fundamentals: OOP, Data Structures & Algorithms, DBMS, SDLC, Agile Methodologies

Languages: Python, Java, JavaScript, TypeScript, SQL

Web & Mobile Development: React.js, Next.js, React Native, Redux, Spring Boot, HTML5, CSS3, Node.js, FastAPI, REST APIs, Responsive Design

Systems & Architecture: Microservices Architecture, Docker, Nginx (Load Balancing), Service Discovery, Circuit Breaker Pattern, Redis Streams (Pub/Sub)

Backend Tools: SQLAlchemy, Alembic, Celery, Authentication (JWT/OAuth2), CRUD Operations

Databases (SQL & NoSQL): PostgreSQL, MongoDB, MySQL, SQLite, Redis

Version Control & Tools: Git, GitHub, GitHub Actions, Postman, Swagger, Linux/Bash

Cloud & DevOps: AWS, Firebase, CI/CD, Vercel, Render

WORK EXPERIENCE

Frontend Developer Intern — Resolute AI Software Private Limited

Remote | Sep 2026 – Present

- Develop web applications using React.js and Firebase, implementing state management and reactive signals for dynamic UI behavior.
- Build responsive interfaces with HTML, CSS, Bootstrap, and JavaScript/jQuery, translating Figma designs into functional, accessible components.
- Integrate REST APIs and manage version control via GitHub; deploy applications to cloud platforms as part of the release workflow.
- Maintain technical documentation and report progress daily to the reporting manager while collaborating with the team on assigned tasks.

Full Stack Developer Intern — Agrisethu Private Limited

Remote | Aug 2026 – Present

- Contribute across the full SDLC planning, design, development, testing, deployment, and documentation building responsive front-end interfaces and RESTful back-end services with React.js, Next.js, and Node.js.
- Design and maintain SQL/NoSQL database structures, write and optimize queries, and support data integrity, backup, and performance monitoring.
- Perform unit and integration testing, identify and track defects, and support User Acceptance Testing (UAT) prior to deployment.
- Maintain technical, API, and database documentation; collaborate with developers, designers, and project managers through sprint planning and review meetings.

PROJECTS

Cyber Threat Intelligence Platform | [Link](#)

Tech Stack: FastAPI, React.js, React Native, MongoDB, Redis, Celery, Docker, Blockchain, JWT/OAuth2

- Architected a microservices-based threat intelligence platform (Auth, Ingestion, Detection, Blockchain Ledger, Notification services) with Redis caching and Celery async pipelines for high-throughput threat processing.
- Implemented a blockchain-backed immutable audit log for tamper-proof incident records, integrated real threat-intel feeds with JWT/OAuth2 authentication, and built a React Native companion app for real-time push alerts on critical threats.

DevPulse — Real-Time CI/CD & Systems Observability Platform | [Link](#)

Tech Stack: Node.js, Docker, Nginx, Redis Streams, PostgreSQL, GitHub Actions, WebSockets

- Designed a distributed observability system for CI/CD pipelines with Dockerized microservices, Nginx-based load balancing, and service discovery, deployed via GitHub Actions to Vercel (frontend) and Render (backend services).
- Implemented circuit-breaker fault tolerance and Redis Streams-based async messaging to decouple services under load, with real-time CPU/memory monitoring, centralized log aggregation, and WebSocket-driven live dashboard updates.

ACADEMIC QUALIFICATION

B.Sc in Computer Science

Calicut University, Kerala | CGPA: 7.9/10

ACHIEVEMENTS

- Won 1st Place in an inter-college debugging competition.

CERTIFICATIONS

- HackerRank Certified — Software Engineer
- HackerRank Certified — Problem Solving
- Generative AI Career Essentials — Microsoft

SOFT SKILLS

Debugging & Problem-Solving | Teamwork & Collaboration | Communication | Analytical Thinking | Adaptability | Willingness to Learn
